ERPAdvance Asia FOR SAGE 300

NORMING ASSET MANAGEMENT

Asset Tracking

Know where every asset is, who has it and what state it is in

Asset Tracking keeps the physical status of your assets up to date using barcode or QR code labels, mobile apps and handheld scanners. Scan results are checked against the asset register in Sage 300.

HOW IT WORKS

Label — Barcode or QR code → **Scan** — Mobile app or scanner → **Update** — Location, status, custodian → **Reconcile** — Audit and exception report

THREE WAYS TO SCAN BARCODE OR QR CODE LABELS

eTracker app
Real time · iOS and Android
Scan by location or category; updates sync at once.

Asset Tracker app
Offline · Android
For remote sites: download, scan, upload when online.

Handheld scanner
Offline · high volume
Fast scanning with major barcode scanner brands.

→ **Asset register**
- Location updated
- Status updated
- Custodian updated
- Exceptions reported

Illustration: choose the scanning option that suits each site; results update the register in Sage 300

KEY CAPABILITIES

Barcode management
Create barcodes with new assets or later, numbered by category, location and more.

Asset status
Standard statuses such as In Use, Missing and Disposed, or your own.

Movement and custody
Transfers between locations, departments and custodians, with full history.

Asset register inquiry
Search by category, cost centre, location or asset ID; drill down to history.

Physical audit
Compare scans with the register to find missing or misplaced items.

Audit reports
Audit reports and exception lists for reconciliation, exportable for analysis.

NORMING ASSET MANAGEMENT SUITE

Accounting — Depreciation, disposal and G/L posting.
Tracking — Barcode, RFID and the eTracker mobile app.
Maintenance — Scheduled maintenance and repair history.
Leasing — Leased-in and leased-out assets.

Integrates with Sage 300 G/L, A/P, A/R, I/C and PJC. eTracker is on the App Store and Google Play. Supports barcode, QR code and RFID devices; existing asset data can be imported from non-Sage systems.
