FOR SAGE 300

NORMING ASSET MANAGEMENT

Asset Maintenance

Plan, record and control the cost of maintenance in Sage 300

Asset Maintenance manages preventive, corrective and SLA-based maintenance for equipment linked to the asset register. Work is tracked from planning to posting, with costs checked against budget.

HOW IT WORKS

Trigger
Schedule, meter or manual

→

Order
Regular or SLA-covered

→

Record
Labour, parts, services

→

Post
G/L, A/P or I/C

Illustration: how maintenance work is triggered, ordered and costed in Sage 300

KEY CAPABILITIES

Equipment and components
Equipment from the asset register, with optional components and a primary SLA.

Meter and usage tracking
Meter readings and usage history; thresholds create orders and alerts.

Service level agreements
SLA set-up, renewal and closure, with vendor, hours, response time and price.

Budget control
Check costs by SLA, order and resource; warn or block when over budget.

Purchasing link
Raise purchase requisitions from orders, via Sage 300 P/O or Norming RM.

Maintenance reports
Orders, maintenance history, G/L transactions and equipment meters.

NORMING ASSET MANAGEMENT SUITE

Accounting
Depreciation, disposal and G/L posting.

Tracking
Barcode, RFID and the eTracker mobile app.

Maintenance
Scheduled maintenance and repair history.

Leasing
Leased-in and leased-out assets.

Integrates with Sage 300 G/L, A/P, I/C and P/O. Costs can be capitalised into the asset value where applicable, and equipment with an open order cannot be disposed of, split or merged.
