ERPAdvance Asia

FOR SAGE 300

TAIROX · DATA MANAGEMENT SUITE

Fast Database Management

Scheduled Sage 300 backups, restores and checks

Schedules Sage 300 backups (DBDump), restores and data integrity checks, keeps dated archives and emails a log. It includes Fast DBTools and Fast Database Copy.

HOW IT WORKS

Set up a job
Backup or restore

→

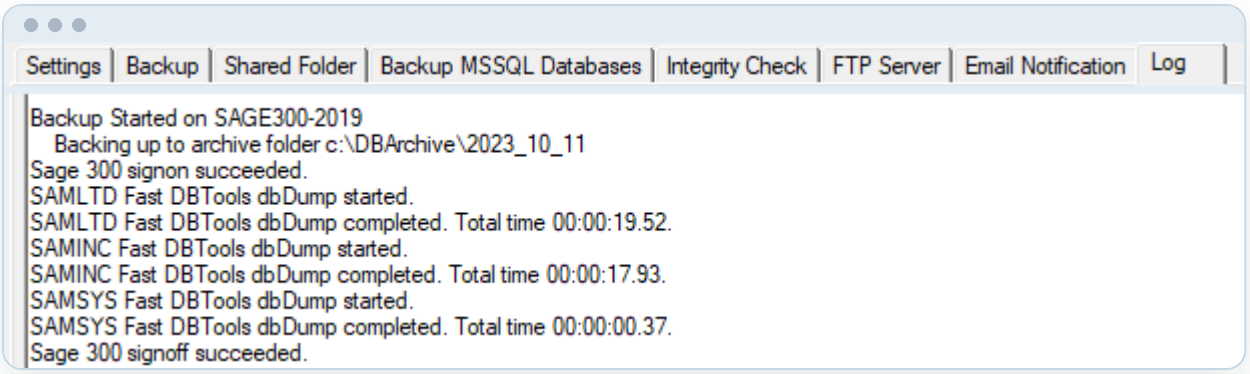

Add databases
System, company, SQL

→

Test run
Watch the Log tab

→

Schedule it
Create a Windows task

A backup log: each company dumped with Fast DBTools, with all job tabs above

▸ Watch the demo

KEY CAPABILITIES

Automated backups
Dumps system and company databases and Sage 300 shared folders into a dated archive.

Archive clean-up
Keeps the number of archives you set and deletes the oldest to save disk space.

Built-in integrity checks
Runs Fast Data Integrity after a backup or restore, or as a job on its own.

Off-site copies
Sends zipped archives off-site by FTP, FTPS or SFTP, with automatic retries.

Restore to a test company
Load a backup into a database with another name, such as a test copy.

Fast Database Copy
Copies databases straight to a target database, with no DBDump or DBLoad step.

GOOD TO KNOW

Email log
Task, date and status by email.

Exclusive access
Copies can run only with sole access.

Other SQL databases
Backs up Sage CRM and other SQL databases.

Secure settings
Passwords are encrypted.

Supports Sage 300 2012 to 2027 on SQL Server. Uses a free LanPak. Replaces SOX Backup Enterprise and Express.

See how it fits your business
