FOR SAGE 300

TAIROX · DATA MANAGEMENT SUITE

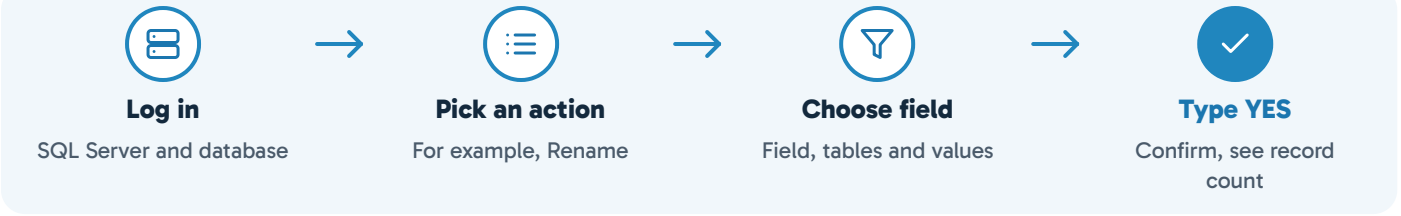
Optional Field Manager

Clean up and repair Sage 300 optional fields

Optional Field Manager deletes, fills in, replaces, renames and resizes Sage 300 optional fields across all tables, and repairs field counts. Built for administrators and partners tidying up Sage 300 data.

HOW IT WORKS

▸ Watch the demo



KEY CAPABILITIES

Delete old fields
Removes a field from all tables, with the option to remove its Common Services setup too.

Fill blank values
Adds a default value to rows that have none. Existing values are left alone.

Replace values
Finds and replaces optional field values in the tables you select.

Rename fields
Changes an optional field's name or description in all tables.

Change field length
Makes Text optional fields longer or shorter (1-60 characters) in all tables.

Repair field counts
Fixes optional field counts that don't match the actual records.

GOOD TO KNOW

Safety check
Type YES to confirm each operation.

Field types
Text, Amount, Number, Integer, Yes/No, Date, Time.

All tables
One change applies across every table.

Single user
Users sign out of Sage 300 first.

Supports Sage 300 2012 to 2026 on SQL Server. Needs .NET Framework 4.6.2 or higher. Deletes are blocked if a third-party program uses the field. Back up first.

See how it fits your business
