Productivity Tools

Bulk updates and extra features inside Sage 300

Productivity Tools is a set of programs that run inside the Sage 300 desktop. They help finance and operations teams enter orders faster, update hundreds of transactions in one step, and copy setup across companies.

KEY CAPABILITIES

Extended Order Entry
Shows more on the order screen, such as prices, quantities and comments. Handles 100-200 line orders.

Ship and invoice in bulk
Ship Orders ships hundreds of orders at once, and can invoice them at the same time.

Update orders in bulk
Substitute items, kits and BOMs, or change prices, dates and hold status, on many orders.

Multi-company setup
Copy customers, vendors, items and fiscal calendars to many companies. Create a new year in all.

SmartFinders
Find customers, vendors and items like a web search, matching parts of several fields.

Stock Reorder
Works out what to reorder and creates POs or requisitions, with a preview that shows errors.

GOOD TO KNOW

Modules covered
G/L, A/R, A/P, I/C, O/E, P/O, PJC, Payroll.

Changes logged
Copy and bulk jobs log changes and errors.

Sage 300 security
Uses Sage 300 activation and security groups.

Web Screens
Includes Web Screens for O/E and P/O.

Runs inside the Sage 300 desktop. Sage 300 2018 or later (a separate installer covers 2012 to 2017). Some tools, such as copying G/L accounts, need the Enterprise edition.
